

Jay Tillu

Flutter Developer & NOC Engineer

About Me

Hi, I'm Jay Tillu. I create revolutionary apps that solve real-life problems. No matter what the problem is. I believe technology has a solution to every problem. I'm a professional blogger as well. To help people understand the topic in the simplest way, I write blogs.

Experience

SIMPLE2CALL - NOC & Software Engineer

April 2022 - Present

- At Simple2Call my job is to handle Network Operations, Software Creation, and Up-gradation. Monitoring Switches, Ports, and Trunks to find and troubleshoot the problems if any. I have used Zoho for Ticketing. Also, I create websites and upgrade our portals.

NOVUMLOGIC - Flutter Developer

June 2021 - September 2021

- At NovumLogic my work is to create cross-platform applications using Flutter Framework. I have worked with Firebase for the back-end. Use Firebase Services like Cloud Firestore, Phone Auth and Social Auth. I also work with APIs as per project needs.

OPSARA INC. - Team Member Operations

August 2020 - December 2020

- At Opsara Inc, I was Team Member Operations. My job is to Monitor Servers and Switches. I have used Zabbix for Monitoring and Freshdesk for ticketing. I have also handle Support work over there.
